ELSEVIER

Volume 504, Numbers 1–2, 29 November 1995

Journal of Organometallic Chemistry

Contents

Preface vii

Regular Papers

Methane activation by tris(imido) complexes: the effect of metal, ligand and d orbital occupation
M.T. Benson, T.R. Cundari and E.W. Moody (Memphis, TN, USA) 1

H/D exchange via reversible pyridine ortho-metallation, and competition between C–H oxidative addition and CO coordination in hydrido–carbonyl triangular rhenium clusters: a ^{1}H-NMR investigation. X-ray crystal structure of the anion $[Re_3(\mu\text{-}H)_2(CO)_{11}(Py)]^-$
T. Beringhelli, L. Carlucci, G. D'Alfonso, G. Ciani and D.M. Proserpio (Milano, Italy) 15

C–H bond activation of thiophenes at iridium: a lower energy process than C–S bond scission
C. Bianchini, M.V. Jiménez, A. Meli, S. Moneti and F. Vizza (Firenze, Italy) 27

Photochemistry of Os(η^6-arene) complexes in low-temperature matrices: an infrared spectroscopic study of C–H bond activation
S.-A. Brough, C. Hall, A. McCamley, R.N. Perutz (York, UK), S. Stahl, U. Wecker and H. Werner (Würzburg, Germany) 33

Reactions of C–H bonds in organic oxygenates with octaethylporphyrinato rhodium(II) and iridium(II) dimers
K.J. Del Rossi, X.-X. Zhang and B.B. Wayland (Philadelphia, PA, USA) 47

Formation of organometallic exciplexes of the type [Hg(η^2-arene)] in mercury photosensitized reactions of aromatic compounds
L.A. Fowley, J.C. Lee, Jr., R.H. Crabtree (New Haven, CT, USA) and P.E.M. Siegbahn (Stockholm, Sweden) 57

Mechanistic aspects of the oxidative functionalization of ethane and ethanol by platinum(II) salts in aqueous medium. Role of platinum(II)–olefin and platinum(IV)–alkyl intermediates
A.C. Hutson, M. Lin, N. Basickes and A. Sen (University Park, PA, USA) 69

C–H activation by aqueous platinum complexes: A mechanistic study
G.A. Luinstra, L. Wang, S.S. Stahl, J.A. Labinger and J.E. Bercaw (Pasadena, CA, USA) 75

Ab initio molecular orbital study of oxidative addition of H_2 and CH_4 to the $RhCl(CO)(PH_3)_2$ complex
D.G. Musaev and K. Morokuma (Atlanta, GA, USA) 93

Photophysical aspects of C–H bond activation in rhodium dicarbonyl complexes
A.A. Purwoko, D.P. Drolet and A.J. Lees (Binghamton, NY, USA) 107

On the mechanism and regioselectivity of alkane photocarbonylation catalyzed by $Rh(PMe_3)_2(CO)Cl$
G.P. Rosini, K. Zhu and A.S. Goldman (Piscataway, NJ, USA) 115

Ligand effects as probes for mechanistic aspects of remote C–H bond activation by Iron(I) cations in the gas phase
D. Schröder and H. Schwarz (Berlin, Germany) 123

A novel aminomethylation reaction of gaseous alkanes with tert-methylamine *N*-oxides via C–H bond activation by copper(II) salts
Y. Taniguchi (Fukuoka, Japan), S. Horie, K. Takaki (Higashi-Hiroshima, Japan) and Y. Fujiwara (Fukuoka, Japan) 137

Preliminary Communications

C–H bond activation in functionalized organic compounds with $Cp^*(PMe_3)IrMe(OTf)$: generation, structural characterization and metal-based rearrangement of the acetone activation product $Cp^*(PMe_3)Ir(\eta^3\text{-}CH_2C(OH)CH_2)^+OTf^-$
B.A. Arndtsen and R.G. Bergman (Berkeley, CA, USA) 143

Formation of 2-thienyl derivatives during the thermal activation of thiophene by $Tp^*Ir(C_2H_4)_2$
M. Paneque, M.L. Poveda, L. Rey, S. Taboada, E. Carmona (Sevilla, Spain) and C. Ruiz (Madrid, Spain) 147

Directing effect of functional groups in ruthenium-catalyzed addition of substituted acetophenones to an olefin
M. Sonoda, F. Kakiuchi, N. Chatani and S. Murai (Osaka, Japan) 151
